Job Proposal – Python Backend Developer

Location: Madrid (hybrid)
Contract type: Permanent
Required experience: More than 4 years

Job Description

We are looking for a Python Backend Developer to join our technology team. The selected candidate will participate in the design, development, and maintenance of scalable backend services based on APIs and modern cloud architecture.

Responsibilities

- Develop backend services in Python.
- Design and implement REST APIs.
- Maintain and optimise existing applications.
- Work with relational and NoSQL databases.
- Collaborate with frontend, product, and QA teams.
- Deploy and maintain applications in cloud environments.

Technical Requirements

Mandatory:

- More than 4 years of experience as a backend developer.
- Strong experience with Python.
- Knowledge of Django and/or FastAPI.
- Experience with REST APIs.
- PostgreSQL or MySQL database management.
- Regular use of Git.

Nice to have:

- Experience with MongoDB or other NoSQL databases.
- Knowledge of Docker and CI/CD.
- Experience with AWS.
- Agile / Scrum methodologies.

What We Offer

- Technical projects with real impact.
- Collaborative team and flexible environment.
- Hybrid work and flexible hours.
- Training and professional growth plan.
- Competitive salary based on experience.
